**Equations**

Left side:  $2x + 1$  Right side:  $9$

The number value on the left equals the number value on the right.

Let's choose mugs and balls to represent the equation above.

**2.3 Interpreting Situations in Terms of Graphs**

During June, John saved his money from mowing lawns. His plan was to save all of his mowing money on the 15th day of the month for a vacation. At the last minute, John saved and on the 15th day he had not saved half of his money. Which graph best represents the behavior of money he has left after his 15th day vacation from the bank?
